

Induction Bending Services

for even bigger pipes and sections

Max. capacities:

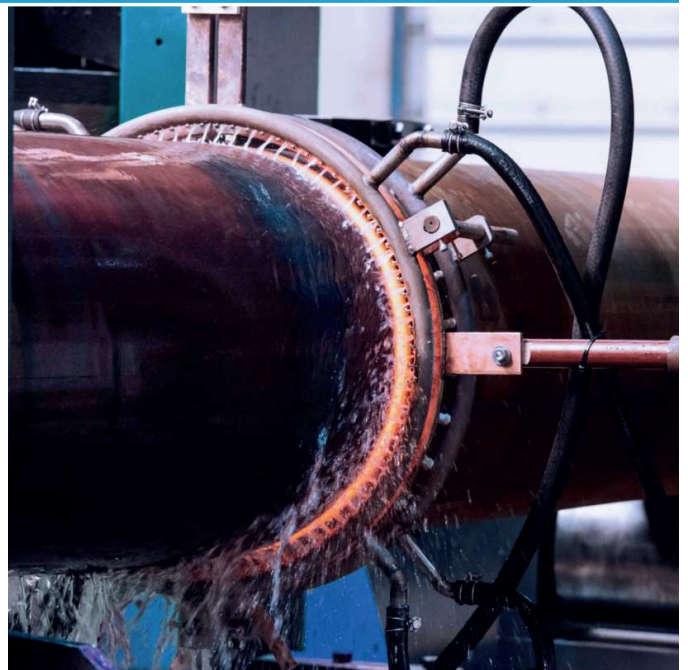

SHS 500 x 500 x 25mm
RHS 600 x 400 x 25mm

TUBE 914 x 50 mm
508 x 80 mm

Standard Structural Profiles
HEA 1000
IPE 1000

Induction Bending Services

Bending radius:

- Min. bending radius 320mm or 2.5D
- Max. bending radius 16,000mm

- Bending arm 406mm - 114mm, max. 182° radius, 2D - 3,000mm
- Bending arm 914mm - 406mm, max. 120° radius, 2D - 16,000mm

With special large radius device: max. bending radius is 80,000mm

Post bending processes:

- 3D robot cutting
- Qualified welding
- Non destructive testing
- Surface treatments

Applications:

- Industrial equipment
- Infrastructure constructions
- Offshore energy
- Oil & Gas pipelines
- Petrochemical
- Power Generation
- Shipbuilding
- Steel building constructions, etc.
